PROJECTS

Python-Discord-Bot ↗
Jan 2026

Discord Chatbot – Python | discord.py
- Developed a Discord chatbot to automate server interaction and moderation using Python and discord.py.
- Implemented automated welcome messages to enhance new member engagement.
- Built real-time message moderation to detect and filter abusive language.
- Designed custom slash commands (e.g., /hello) for interactive user experience.
- Secured sensitive credentials using environment variables with .env.
-

Ai_Personal_ChatBot ↗
Nov 2025

Developed a personal AI assistant chatbot similar to ChatGPT,Gemini, designed to deliver smart, real-time, and context-aware responses based on the user's personal data. Built using Node.js, Express, React, MongoDB, and integrated Gemini API for advanced NLP capabilities.

Blog App--The Backend Project ↗
Jul 2025 - Aug 2025

Blog App API (Backend Only)
Node.js | Express.js | MongoDB | OTP Authentication | JWT | Nodemailer
A full-featured backend API for a blogging platform with secure CRUD operations. Implemented custom email-based OTP authentication for signup and login, eliminating the need for passwords. Used JWT tokens to protect authenticated routes. Integrated email notifications for users upon blog creation.

SKILLS

- JavaScript
- Node.js
- Express.js

- C++ Programming
- JWT
- PostgreSQL
- Backend development
- APIs
- MongoDB
- HTML
- React
- REST API
- Postman
- CSS
- Next.js
